FYI: There are various exposure pathways that can be scored – groundwater, surface water, soil, and air. Each can generate a maximum of 50 points. If we have one pathway that scores 50, we usually won't even prepare a score for the other pathways (it is expensive, time consuming, and unnecessary). For Hoosick, we scored only the groundwater pathway. Scoring 50 on a given pathway is not that unusual.

Ex. 5 - Deliberative Process

What is the numerical cut off for being eligible for listing?

Judith

Senator Gillibrand has asked for a call with the Administrator regarding Hoosick Falls and the request for SF listing. Scheduling is in the midst of trying to find a time that will work for a call so I will let you know where it lands – hopefully sometime this week, maybe as soon as tomorrow. In the meantime, can you send me a short backgrounder for the administrator on the request that I can then share with OLEM for their input?
